

REMARKS

The application is to be amended as previously set forth; amendments are being made in this document to incorporate the claims as amended in the PCT application of which this is a 371 application. The Preliminary Amendment mailed December 13, 2004, inadvertently utilized the claims as initially published in the International PCT Application. International Patent Application No. PCT/EP03/06341, of which the present application is a National Phase Entry, was amended on June 7, 2004, to include a new claim set. Therefore, the present Supplemental Preliminary Amendment replaces the claim amendment submitted with the Preliminary Amendment of December 13, 2004.

Support for new claims 29-51 can be found throughout the specification, for example, in claims 1-28. Support for the oligopeptide sequence being Xaa₁-Xaa₂-R-Xaa₃-Asp-Xaa₄, wherein the sequence is as defined in the claims, is found throughout the specification and sequence listing, for example, as shown in SEQ ID NOs:17-24, and SEQ ID NOs:25-28 (starting at about amino acid 97-99).

If questions remain after consideration of the foregoing, the Office is kindly requested to contact applicants' representative at the address or telephone number given herein.

Respectfully submitted,

G. Scott Dorland, Ph.D.
